This minor is designed for non-engineering students with an interest in learning more about technology's important role in today's society; and who may be working with engineers and technology based opportunities in the future. Specific learning goals include:

- Develop a basic understanding of the engineering design process
- Understand the capabilities and limitations of technologies and engineered systems
- Be able to make informed decisions about engineering activities and technologies
- Be able to work effectively as a member of a team including technology experts

The program advisor will work with you on selection of a suitable minor program to meet your specific career objectives. The advisor will approve and sign the Minor Program Form. You may then file the Minor Program Form with your college or school to receive a minor in Engineering Sciences.

Key Curriculum Components

- Core - Introduction to Engineering (4 credits)
- Engineering Science (2-4 credits)
- Technology and Society (3 credits)
- Capstone interdisciplinary teamwork experience (6 credits)
- Total Credits (15-17 credit minimum)

Note for students in the minor: You will be expected to complete a first calculus course (e.g., Math 1131 or 1151). This course will fulfill the math requirement of all courses for the minor. Other prerequisites will depend on courses selected.

Core: 4 Credit Hours: The Engineering Sciences Minor contains the Introduction to Engineering course sequence ENGR 1181.01 or .02 and ENGR 1182.01, .02 or .03 (Honors substitute permitted.)

ENGR 1181.xx - Fundamentals of Engineering 1
