Assessing the Second-Year Experience

Lance Kennedy-Phillips,
Center for the Study of Student Life

This seminar will provide an overview of the “Learner Model.” This model serves as the conceptual framework for the work of the Center for the Study of Student Life. Second, we will share findings from a study our office conducted of the second-year experience at The Ohio State University. Finally, we will engage the group in a discussion of how the model and our research findings could be useful with engineering students.
