Sense of Belonging Among STEM Students of Color

Joey Kitchen, School of Teaching & Learning
Leroy Long, EEIC

The presentation will chronicle the experiences of Black and Latino men in STEM fields. We will describe the concept of sense of belonging in the context of higher education, its relation to a number of desired college outcomes, the importance of developing a sense of belonging in STEM fields where collaborative work is at a premium, the successes and challenges experienced by Black and Latino Males in forming a sense of belonging in STEM, implications for practitioners, and future directions.

Intervention to Improve Sense of Belonging of First-Year Engineering Students

Kari Jordan, EEIC

This fall at Ohio State the ENGR 1181 sections are participating in an intervention to improve their sense of belonging in the engineering program. I will discuss the method and where I am to date with the study.
